OBJECTIVE

Software Engineer with 4+ years of experience in database management, backend development, and automation, specializing in SQL, MySQL, and Python-based solutions. Strong expertise in relational database design, query optimization, and building scalable data-driven applications. Experienced in developing full-stack applications using Python and MySQL, along with implementing automated data workflows and validation processes. Familiar with data modeling using Power BI, ETL concepts, and cloud-based data platforms. Adept at transforming complex datasets into actionable insights and improving system efficiency through automation.

EDUCATION

Bachelors of Engineering, Mumbai University

2018 - 2022

Stream: Electronics and Telecommunications. CGPA: 8.39/10

SKILLS

Technical Skills	Python (pandas, NumPy, APIs), MySQL, PowerBI, SQL, UNIX Scripting.
Soft Skills	Leadership, Adaptability, Initiative, Creativity, Problem-solving
Certification	Azure - AI, Fundamentals, Data Fundamentals, Qualys Compliance Specialist

EXPERIENCE

DXC Technology
(Software Engineer)

August 2022 - Present
Mumbai, India

- Developed Python-based automation solutions to streamline data processing and reporting workflows, reducing manual effort by 50%.
- Designed and optimized complex SQL queries on relational databases, ensuring efficient data retrieval and validation.
- Applied strong RDBMS concepts including normalization, indexing, and data integrity to improve data consistency and performance.
- Worked extensively with structured data formats (CSV/JSON) for ingestion, transformation, and reporting.
- Performed data analysis, validation, and reconciliation to ensure accuracy across large datasets using Power BI.
- Automated workflows for data validation and reporting, improving reliability and reducing errors.
- Utilized Linux/Unix and scripting for automation and operational tasks.

PROJECTS

Automated Reporting Analytics System: Built a Python + SQL-based system to generate recurring reports. Reduced manual reporting effort and improved data accuracy.

Data Analysis Dashboarding: Created dashboards (Power BI / Excel) to visualize KPIs and trends. Enabled stakeholders to make faster, data-driven decisions.

ACHIEVEMENTS

DXC Champs Award - 2024, 2026. Recipient of the DXC Champs Award (Q3, FY24) for outstanding contributions in delighting customers, fostering growth and driving customer satisfaction, contributing to the company's strategic objectives

DXC Collaborators Award - 2024. Received the DXC Collaborators Award (H2 FY24) for exceptional teamwork and collaboration, contributing to customer satisfaction, business growth, and positioning DXC Technology as a leading IT company.
